EDUCATION

University of California, Irvine, USA

Master of Computer Science (MCS)

Relevant Coursework: Data Structures, Algorithms, Parallel & Distributed Computing, Big Data Management.

Sep 2022 – Dec 2023

GPA – 3.97/4.0

SRM Institute of Science & Technology, India

Bachelor of Technology in Computer Science (B.Tech CSE)

Relevant Coursework: Database Design, Operating Systems, Object Oriented Programming, Artificial Intelligence, Machine Learning.

Jun 2018 – May 2022

GPA – 3.94/4.0

CERTIFICATIONS

AWS Certified Cloud Practitioner (AWS CLF-C01)

Issued: May 2023

Python Programmer Certified by Python Institute (PCEP-30-02)

Issued: Jul 2023

SKILLS

Programming Languages: Python, Java, Bash, Shell Scripting.

Amazon Web Services (AWS): EC2, EBS, S3, CloudWatch, DynamoDB, Lambda, ECS, EKS, CloudFront, CloudFormation.

DevOps Tools: Docker, Jenkins, Kubernetes, Apache Kafka.

Web Technologies: HTML5, CSS3, JavaScript, Flask, React, Node.js, Express.js, Vert.x.

Other Technologies: Oracle Cloud Infrastructure (OCI), SQL, MongoDB, GitHub, BitBucket, Jira, Linux.

PROFESSIONAL EXPERIENCE

Genentech, CA, USA

Mar 2024 – Present

Software Development Engineer

- Spearheaded backend development for Genentech's Digital Health Application using **Java** and **Vert.x**, enhancing functionality and performance.
- Proficient in **RESTful API development** with Vert.x, contributing to a **15% reduction** in **API response time**.
- Conducted **unit testing** with **JUnit4** and **Mockito**, and **SonarQube analysis**, achieving **higher code coverage** and service reliability.

Match4Action-CrowdDoing, CA, USA

Jan 2024 – Mar 2024

Full Stack Engineering Intern

- Contributed to phase 0 development of **Nature Counter app**, promoting mental well-being through nature immersion and gamified activities.
- Implemented a reward system, **increasing user engagement** by **40%** and **interaction frequency** by **25%**.
- Designed a course blog webpage, **improving content accessibility** by **35%** and **user retention** by **20%** through concise and easily digestible information.

Teenpreneur, India

May 2020 – Aug 2020

Summer Intern

- Collaborated with a team of 12 members and digitally distributed their flagship product; an e-book titled **“CashBook101”**.
- Identified the most potential user-base for our product to increase reach by using **Google Analytics**.
- Engaged with over **3600 influencers** over the course of 90 days. **Closed 18 high-valued influencers** to help market our product.

PUBLICATIONS

Best Paper Award. Presented a paper titled **“Face Mask and Social Distancing detection using Deep Learning”** at the Virtual **International Research Conference on IoT, Cloud and Data Science (IRCICD'22)**.

ACADEMIC PROJECTS

Mask Mandate Enforcement System

- Led a team of 3 to build a smart monitoring system for enforcing Covid-19 regulations by scanning for face masks using **ResNet50**.
- Trained on a Kaggle dataset using **Faster Regional Convolutional Neural Network** with **Region Proposal Network** for ~150 epochs.
- Deployed on 36 cameras simultaneously, resulting in **accuracy of 96%**, and **latency of 1.7 seconds**.

Background BGone

- Developed a progressive web app using **Flask**, integrated **ResNet50** with **Transfer Learning** to allow users to create stickers by removing backgrounds from their images.
- Enhanced user experience with a quick preview (**50% faster**), download options, grid view, **boosting image access and sharing efficiency** by **30%**.
- Achieved an **accuracy of 90%** and a **response time of <1.5 seconds**.

Text Summarizer using Gen AI

- Engineered a Flask application for **real-time text summarization** with a processing speed of **<2 seconds** per document.
- Utilized **Hugging Face Transformers** to generate summaries with **90%+ accuracy** for diverse text inputs.
- Crafted an intuitive interface with **99% uptime** and **effective error handling**, optimizing user experience and reliability.
